This is a one-day intensive and practical course catering exclusively to medical doctors who are establishing their medical practice or who would like to improve the efficiency of their current practice. (CPD points allocated)

Throughout your training program you develop excellent clinical skills. However, it is recognised

that there is a general lack of information provided to doctors on managing the business aspect of their medical practice.

Business experts will offer advice in a program that will enable delegates to establish, maintain and promote their medical practice and effectively drive their business forward.
